Authorization to Prepare a Site for High Precision Stereo
Comparator [redacted]

25X1A

25X1

REFS : (a) Memo dtd 24 Sept 68 to C/RECD/OL fr EO/TSSG/NPIC, Subject:
Building Modification Design for Comparator

(b) Memo dtd 13 Aug 68 to D/L fr D/NPIC, Subject: Request for
an Authorization to Prepare a Site for a High Precision
Stereo Comparator [redacted]

25X1A

1. Reference (b) requested authorization to spend [redacted]
to prepare a site for the installation of the subject named
comparator.

25X1A

2. The approval given to reference (b) cited the condition
that the work request would be issued after review of preliminary
drawings and specifications by the Real Estate and Construction
Division, OL and the Construction Division, Region 3, General
Services Administration (GSA).

25X1A

3. A review of conceptual drawings (pre-preliminary) has
been made by the parties cited above. The concept is approved.

25X1A

4. Reference (a) set forth reasons for the firm [redacted]
[redacted] being selected for the design phase of the building
modification involved in the project. This office has no objection
to such selection and has informally received the concurrence of
GSA in this selection. A letter forwarding the work order to GSA
should cite the reasons for the use [redacted] as the
design engineers with accent being given [redacted] prior in-
volvement with the development of the comparator and his knowledge
of the mechanical and structural problems connected with the device.

5. The proposed scope of work and estimate of cost is set
forth in the attachment.

CONFIDENTIAL

Approved For Release 2002/08/28 : CIA-RDP78B04747A000200030089-0

SCOPE OF WORK

1. The intent of this project is to provide the necessary modifications to portions of the first floor of [REDACTED] (Rooms 117, 117-1, 2, 4, 5, and 21), Navy Yard, Washington, D.C. to allow for the installation and the environment for functioning of the device known as the [REDACTED] Stereo Comparator. Modifications anticipated include, but are not limited to, foundations, mechanical systems, electrical systems, lighting, and partition changes.

25X1A

2. The engineering phase of the project is to prepare a design for the required modifications to accommodate the comparator and to prepare the technical specifications and the construction drawings in such numbers as are required by the General Services Administration (GSA) (allowing for two extra sets of drawings and specifications for the sponsoring agency).

3. The engineering contractor is to provide such services as are required to accomplish the engineering phase of the work, including such surveys and investigations as may be required, the incorporation of such design data as has previously been acquired, and coordination with the manufacturer of the comparator and the representatives of the Government working with the manufacturer. Concept drawings are available and are to be used as guides for the engineering effort. The "black box" shown in the concept drawings is not in the contract.

4. The construction contract should provide for the completion of all construction work prior to 19 August 1969. In connection with this requirement, a CPM network should be specified targeting completion on that date.

5. The estimated cost of the project is:

[REDACTED]

Construction (including contingencies)

For Engineering Contract

For GSA Surcharge

Total to be Transferred to GSA

NOTE: [REDACTED] has been estimated for the construction of the "black box" and is not involved in either of the two phases under GSA and, therefore, should not be cited as part of the work order.
